PROFESSIONAL SUMMARY

Detail-oriented Frontend Web Developer with a strong foundation in C# software engineering and hands-on expertise building responsive, high-performance web applications using React, Next.js, TypeScript, and Tailwind CSS. Proven ability to architect scalable state management solutions, integrate RESTful APIs and Firebase backend services, and deploy modern web experiences to production.

TECHNICAL SKILLS

- **Frontend:** React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Styled Components, Redux Toolkit, Vite
- **Backend & Database:** Node.js, Express, REST APIs, Firebase Authentication, Cloud Firestore, PostgreSQL, MySQL, Stripe Checkout
- **Tools & Workflow:** Git, GitHub, Visual Studio Code, Vercel, npm, Responsive Web Design, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Engineering Intern

Virtual Engineering Internship | August 2026 – Current

- Developed and implemented dynamic UI modules, skeleton loaders, and interactive components using modern JavaScript frameworks.
- Managed Git feature branches, submitted rigorous code reviews, and created pull requests to streamline team collaboration and deployment cycles.
- Integrated third-party REST APIs and optimized frontend rendering performance across responsive viewports.

FEATURED PROJECTS

Skincare AI Web Application ("Skinstric") | *Next.js, Tailwind CSS, Firestore, Vercel*

- Architected and deployed a server-rendered skincare web application featuring dynamic user flows and persistent Firestore database integration.
- Implemented custom CSS and AOS entrance animations to deliver an engaging, polished user interface across desktop and mobile devices.

Disney+ Platform Clone | *React, Redux Toolkit, Firebase Authentication, Styled Components*

- Built a feature-rich streaming platform clone incorporating secure Google sign-in and persistent user authentication via Firebase.
- Engineered responsive video carousels and managed complex global application state using Redux Toolkit slices.

Unified Frontend Portfolio & Ticketmaster Clone | *React, Next.js, TypeScript, Tailwind CSS, Vercel*

- Developed a fully responsive Ticketmaster event-booking clone with advanced search and filtering capabilities.
- Consolidated multiple showcase applications into a centralized, production-ready portfolio platform deployed on Vercel.

EDUCATION & TRAINING

Full-Stack & Frontend Engineering Training | 2026

- Completed advanced coursework covering Node.js backend development, Express REST API architecture, database management (PostgreSQL/MySQL), and Stripe payment integrations.

Background in C# Software Engineering

- Applied object-oriented programming principles, event handling, and algorithmic problem-solving to software design.
